

# UPGRADE YOUR EXISTING FBK-H CIRCUIT BREAKERS

*The HI-SPEED from Utility Relay Company, the OEM trip unit installed on all newly manufactured FBK-H DC breakers, is now available as a direct replacement for obsolete ITE/ABB Hi-Speed units.*

## **Advantages of Upgrading:**

- Trip unit is micro-controller based.
- Plugs directly into existing wiring harness on older FBK breakers.
- Operates the original OEM trip coil.
- Offers extended range of settings.
- Trip capacitor is a solid-dielectric type which cannot leak.
- Cool operation reduces trip unit overheating.
- Easier to test.
- Trip Unit is readily available.

## **HI-SPEED Features Include:**

- Bi-directional current sensing
- Hi-Speed Fault Protection
- Rate-of-Rise Protection
- 16-Character DC Ammeter
- All Setting in Amps and Seconds
- Displays Last-Trip-Data
- Momentary Alarm Relay
- Supervisory (Remote) Trip Option
- Lockout Relay Option
- 2-Pole Application Optional
